

RESPONSIBLE MINERALS ASSURANCE PROCESS ASSESSMENT REPORT

The flagship program of the RMI, the Responsible Minerals Assurance Process (RMAP), formerly the Conflict-Free Smelter Program (CFSP), takes a unique approach to helping companies make informed choices about responsibly sourced minerals in their supply chains. Focusing on a “pinch point” (a point with relatively few actors) in the global metals supply chain, the RMAP uses an independent third-party audit of smelter/refiner management systems and sourcing practices to validate conformance with RMAP protocols and current global standards. The audit employs a risk-based approach to validate smelters' company level management processes for responsible mineral procurement. Companies can then use this information to inform their sourcing choices. For more information, please visit:

II. ASSESSMENT OBJECTIVES

The objective of the assessment is to assess the Auditee’s level of conformance with the Responsible Minerals Assurance Process GOLD Standard of 2017.

III. ASSESSMENT METHODOLOGY

The assessment consisted of collecting and reviewing objective evidence including documentation, management and employee interviews, facility walk-through, and other observations demonstrating that the smelter/refiner’s due diligence management system conforms, in all material aspects, to the requirements of the applicable Standard.

IV. CONCLUSION

Assessment Results:	
<input checked="" type="checkbox"/>	The assessment was conducted in accordance with ISO19001:2011 Standard, taking into account the guidance provided by the Responsible Minerals Assurance Process. The auditor verified the scope, selected samples, and gathered objective evidence through documentation review, interviews, and visual observations.
<input checked="" type="checkbox"/>	The auditor found that the Auditee’s due diligence system are in conformance, in all material aspects, with the requirements of the Responsible Minerals Assurance Process Gold Standard of 2017 and the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas.
<input type="checkbox"/>	The auditor identified material non-conformance(s) between the Auditee’s systems, processes and practices and the requirements of the Responsible Minerals Assurance Process Tin and Tantalum / Tungsten / Gold Standard of 2017 and the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas. Material non-conformance(s) relate to:
<input type="checkbox"/>	Step 1: Establish strong company management systems

Step 2: Identify and assess risks in the supply chain

Step 3: Design and implement a strategy to respond to identified risks

Step 5: Report annually on supply chain due diligence

Zero tolerance findings: None
